TIP

Repeat this code for more ammunition. To get unlimited ammunition, enable the "All Weapons" code continuously until whatever you want is at 9999 shots. The next time your clip runs out, it will reload automatically, but the magazine (9999) will stay the same. Note: If you are busted, your weapons will disappear and this code will have to be repeated.

Unlockable	Objective
Alternate Costumes	To make your character look different, complete the game one time, then start a new game after saving. You will see a "Normal/Special" option. If you select the Special option, you will appear in a special panda suit.
Beat Oni Spirits/ Unlock An Arsenal	If you make it past all 12 levels of the challenging Oni Spirits mini-game, you unlock a gameplay option that allows you to start the regular game with a wonderful array of toys. Not only do you get to play through the game with the Bishamon Sword, but you get unlimited Arrows and Bullets, and begin with 99 Soul Absorbers in your inventory. In addition, any magic you use automatically respawns after the attack. With this at your disposal, beating the game again and unlocking everything else is a cinch!
Get the Bishamon Sword	Fight through all 20 levels of the Dark Realm. Kill all of the monsters on the 20th level, then open the treasure box to discover the Bishamon Ocarina. In the area just beyond the second Marcellus boss fight, use the Ocarina on the bone door to open it. Head inside and claim the prize: a sword with unlimited magic which kills any non-boss character in a single swipe. A powerful ally, indeed.
Preview for Onimusha 2	After you complete the game for the first time, it prompts you to save. Do so, then start a new game. View the "Special Report" to see a small preview of Onimusha 2, which takes place 10 years after the events in this game.
Unlock Easy Mode	There are two ways of unlocking the easy mode: 1. Beat the game 4 times to make the Easy Mode available. 2. If Osric beats you 5 times or more, the Easy Mode unlocks.
Unlock Oni Spirits	Collect all 20 Flourites and finish the game.

Unlockable	Objective
Axel	After beating the first level, choose the Freeway level. Drive to the middle of the level, where an entrance to the construction lot and a Repair Station are located. There are two cranes; focus on the left one. Eliminate at least several enemies, then position your vehicle halfway up the ledge. If you've centered your vehicle in the middle of the construction site, use the middle ridge to a missile toward the orange control box near the center of the crane.
Downtown Jackpot	On one side of the river in the downtown level is the R&D Chemicals Plant. On the left side of the main building are three giant balls, like the ones in the highway loop level. Shoot the one closest to the sign with a gas can, and it rolls into a building, knocking it down and revealing three healths (which are supplied throughout the level at this location). Shoot the ball on the far left and it rolls into the building directly behind the previous one, giving you six power missiles.
Elevator in Downtown	Find this elevator to pick up power-ups. Find the Atom Bank and face it. To its left is a building with glass doors. Shoot them and they'll blow to pieces. Use the elevator to drive up to the higher reaches of the building. There's one health power-up up there, and it's a great view!
Open Elevators Level	Go to the Highway Loop Level and kill off six or seven of the combatants. Drive to the raised, broken bridge (with the two health pick-ups and another pick-up in between), and find a power plant directly off the road. There are two or three giant steel balls there. Shoot the one closest to the bridge with a Gas Can, and it breaks off and rolls. Stay clear of its path, then follow the ball. When it crashes through a wall, go into the newly opened area and find the Black Cube, plus health and weapon pick-ups, inside.

Open Freeway Level	To open the Freeway for multiplayer action, get 10 Kills in Survival mode in the Snowy Roads arena.
Open Mini-Suburbs Level	To open the Mini-Suburbs for multiplayer action, get 10 Kills in Survival mode in the Drive-In arena.
Manslaughter	In the Prison Passage level, down on the docks to the starboard side of the landed ship, is a stack of crates holding a health power-up. Shoot the crates to blast open a ramp to the health, then shoot at the ship's hull above where the crates are stacked against it. A panel opens, and you can drive into a room inside the ship where Manslaughter is located. Destroy the control panel to unlock the new car.
Minion	Beat Story mode with every character, including those you unlock in the game (Manslaughter, Warthog, Yellow Jacket, and Axel).
Warhawk's Level	To open Warhawk's multiplayer level in the first level (Zorko Bros. Scrap and Salvage, a.k.a. the Junkyard), focus your efforts on the vertical crusher. Drive up the ramp to the broken freeway and drive halfway along it. Aim your car toward the Bob's Big Boy, and shoot it with a Power or a Fire, to avoid hitting any other cars. Once blown up, it creates a ramp to the vertical crusher. Drive down to the newly created green ramp and, when the crusher is down, drive onto it. Drive slowly onto it so you don't go over it. When it ascends, shoot the building on top of the deck, then drive onto the deck. On the left side is a Black Cube, which opens Warhawk's multiplayer level.
Warthog	In the Suburbia level, head to the carnival area. At the gate, take a left and head toward the smoke over the ridge. Speed up and ramp off the angled dirt ridge; you should land below on a building with a large hole in its roof. Go inside and look for a control panel in the corner. Shoot it to unlock Warthog.
Yellow Jacket	There is an airplane circling in the first level. Use a homing missile and shoot it down. After that's done, drive to the lower section of the level. The plane has crashed and you can drive in it. Go to the end, find the console and shoot it with machine gun fire. After four seconds, you can see Yellow Jacket's car lower down.

Timeron's Secret	During the second Timeron encounter (which is in the Space Battle stage) a timer begins ticking from 00'00"00. As the timer keeps going, the Timeron's attacks change, and every 20 minutes or so, a circular drone appears, accompanied by Smash Daisaku's laughter. Avoid this drone for about 2 minutes until it self-destructs, because a single hit will reduce your health to zero. At about 50'00"00 or so, large blue balls appear. These rebound once against the screen, and do 11 points of damage instead of the normal 10 points from the smaller ones. Once the timer gets up to 99'50"00 or so, don't destroy the Timeron yet. Instead, wait out the remaining 10 seconds while avoiding the Timeron's attacks, but don't stay too close to the Timeron, or you'll get killed by the drone. Once the timer reaches 00'00"00 again, you'll hear that nasty laughter again, but this time, "GIVE UP!!" appears in the middle of the screen, and the Timeron self-destructs, accompanied by the message, "YOU OPENED THE - SATORI MIND -." A bit more of that nasty laughter accompanies the next message, "REPROGRAMMED BY NAMI - 1993." Now, instead of getting a Timer Bonus as you usually would, a Soul Bonus of exactly 930,410 points is added to your score.

Config Mode	There is a code called Control mode, which is required before activating this code. To activate Control mode, press ✣, Ⓒ, ✣, Ⓒ, ✣, Ⓒ, ✣, Ⓒ at the title screen, but before pressing START to begin the game, hold Ⓐ as you hit START. Now, rather than just being in Control mode, you can enable Config mode by pressing Ⓑ. Sonic will morph into a ring, and the arrows can move him anywhere, even in the air, or through obstacles such as walls, floors, or even ceilings. You can change the item Sonic appears as by hitting Ⓐ while in Config mode. Ⓑ makes Sonic normal again, and ✣ will place the sprite that you have selected for Sonic to appear as. For example, you press Ⓑ, and Sonic becomes a ring, press ✣ to make a ring appear exactly where the ring icon is. WARNING!: This distorts several different things, such as the score, time, and other various icons throughout the game such as the finish signs at the end of the first two acts of each zone that spin when Sonic shoots past them, and the small score icons that appear whenever Sonic jumps high enough after finishing a level.

All 7 Chaos Emeralds	This code only works for Sonic. First, do the Level Select cheat. In the Level Select menu, go to Sound Test and play the sounds 04, 01, 02, 06. Debug Mode	First enter the Level Select code. Now, go to Sound Test option, and play the following tunes: 01, 09, 09, 02, 01, 01, 02, 04. It should make a ring sound when track 4 is played to signify you've entered it correctly. Now select the stage you want to go to, and press START while holding Ⓐ until the stage starts, and you'll have debug activated. Press Ⓑ to turn Debug on/off, Ⓐ to switch object, and ✚ to put down object selected. Pressing Ⓐ while the game is paused will cause the game to reset.
Debug Mode (Alternate)	At Sound Test, enter: 19, 65, 09, 17, then press Ⓐ+START, then when Sonic and Tails pop up, press Ⓐ+START to go to the Level Select screen. On the Sound Test area, enter 01, 09, 09, 02, 01, 01, 02, 04, and then press Ⓐ+START.
Debug Mode and All Emeralds (when locked-on to Sonic and Knuckles)	First activate and go to the Stage Select. Play the following tracks in Sound Test with Ⓑ: 01, 09, 09, 04, 01, 00, 01, 08. This enables the Debug code, and you should hear a ring chime if the code is entered correctly. Start the selected level with Ⓐ+START. To get all 7 Chaos Emeralds, input this code the same way: 01, 06, 07, 07, 07, 02, 01, 06. You should hear the Emerald chime. Note: this code may not work without the Debug code.
Enable Super Sonic	First, head to the Options menu from the title screen, and then into the Sound Select menu from there. Play the following sounds in this order: 19, 65, 09, 17. After that, press ✚, START. You will be taken back to the title screen. Now, when you see Sonic and Tails (Miles) appear on the screen, press and hold Ⓐ and press START to be taken to the Level Select menu. From this menu, enter the Sound Test feature, and play the following sounds: 04, 01, 02, 06. If done correctly, a familiar tune plays. Exit this menu and start the game as normal. Once you collect a minimum of 50 coins in any level, Jump (Press Ⓐ) to activate the Super Sonic code.
Get Super Sonic on Emerald Hill	First, enter the Stage Select code, shown above. Then you go into the Special Stage in the Stage Select menu. Every time you finish the special stage, press reset and go back to the special stage. Keep doing this until you get the sixth emerald. Then don't press reset. It zaps you with your 6 emeralds into Emerald Hill. Get the last emerald on Emerald Hill, get 50 rings, and jump to be Super Sonic. Don't run out of rings or you will change into Sonic again. The rings start disappearing when you are Super Sonic.
Infinite Lives	First, enable the Level Select cheat and the Debug mode. Choose Sonic and Tails as the players. After entering the codes, choose any stage from the Level Select menu (preferably stage 1). As soon as you can move Sonic, hold ✚ and press Ⓐ (don't let go of down on the D-pad). This activates Sonic's spin; Tails will copy the Sonic spin also. Press Ⓑ and Sonic will become the Debug cursor. (Tails will be locked in the Sonic spin move). Press Ⓐ until the debug cursor displays an enemy sprite, like the monkey or that bee robot. Now that the debug cursor displays an enemy sprite, move the debug cursor to where Tails is, and repeatedly tap ✚. This produces enemies where Tails is, and because Tails is locked in the Sonic spin move, he destroys the enemies. As Tails destroys enemies in this position, press ✚ more until the score for destroying an enemy increases from 100 to 8,000 to a 1Up. Once you have enough 1Ups, press Ⓑ again to revert to Sonic.

Night Mode	Activate level select and hold ✣ while selecting a stage to darken the level. The effect wears off when you die or when you beat the level.

Then press START to return to the title screen. Highlight 1-Player, hold Ⓐ, and press START. You are directed to Level Select screen. Choose a level then press START to begin.

17	Play Invincibility Music
65	Plays a Shifting Sound
09	Plays Casino Night Zone 1-Player Music
19	Plays Sonic 2 Theme

Oil Ocean Music Forever	Go to the Sound Test in the Options menu and put in the sounds, 02, 01, 02, 04, and hold Ⓐ and press START. The Oil Ocean music will now be playing constantly, no matter what stage.
Pseudo Super Sonic	In Oil Ocean Zone, if you manage to take a hit and end up landing in one of those green-and-gold checkered cannons, you'll fall right out, but you'll be moving at twice your normal speed as well as jumping twice your normal height (with twice as much gravity). A good place for doing this would be in Oil Ocean Zone, Act 2, near the first set of pop-tops and cannons. Just jump into the semi-hidden bed of spikes on the right and land in the cannon. Note: Moving at twice normal velocity can often get you stuck in a wall. Also, this wears off if you Super Spin Dash or Spin Dash. It also only lasts for that act.
Super Tails	Normally, when you turn into Super Sonic you lose Tails behind you all the time. Well, after you put in the debug cheat and have started a level (preferably Emerald Hill), turn yourself into a box and place it somewhere on the floor while you are Super Sonic. It should be a switch places box. Hit it and Tails has a permanent invincible circle around him. He stays like this through the whole level.
Unlimited Speed Shoes in 2-Player vs. Mode	In 2-Player vs. mode, get speed shoes and die (while you still have them) and you get to keep your speed shoes until the end of the level.

Hidden Routes

There are three hidden branches from the main path.

Unlockable	How to Unlock
Hidden Route 1	In stage 3-1, when you must descend a short vertical shaft, halfway down here is a wall of pillars to the left. Demolish these, and you find a small side room containing hearts, cash bags, and some Roast.
Hidden Route 2	The second secret, which is an actual hidden Block, is in stage 6-2. At the very beginning you pass a hallway with Axe Knights and falling chandeliers. The third archway has a chandelier but no guard. Hit the floor a couple of times and it'll crumble, revealing a stairwell into a secret area.
Hidden Route 3	The last one is in Block 9-2. You jump across a bed of spikes at the beginning. After this you see several whirlwind tunnels and some coffins. The last upper platform on the right has a coffin and a tunnel. Let the tunnel suck you in and you'll find a hidden area full of bonuses.

Easier Battle with Shredder	During the final battle against Shredder, Shredder splits up into two forms. They're identical in appearance, but only one is real and the other is fake. However, both forms use the lightning attack that instantly kills you by turning you into a normal turtle. However, when either form is weakened to near death, his helmet flies off. As you're beating up on the two forms of Shredder, one of them loses his helmet very quickly. When this happens, leave him alone. This Shredder is the fake, and he cannot use the lightning attack without his helmet on. Only the real Shredder can use the attack, but because it's only him using it, you can avoid it and slowly beat him down with ease. For the rest of the fight, ignore the fake. If you kill him, the real Shredder releases another fake.

Boss Rush Mode	Beat every boss in the game. Next time you go to a warp room, Boss Rush becomes a warp choice.
Complete Chair	Simply sit in the 23 other chairs in the game. Don't forget about Dracula's Throne during the final fight with him; it's your only chance to sit in it.
Crazy Mode	Beat the game once. Start a new game with @CRAZY as a name to play on an extreme difficulty.
Legion (optional boss)	To battle this floating mass of dead bodies, first obtain the 5th Innocent Devil, the Devil Type. With this, head back to Garibaldi Temple, and slide under the crack in the wall near the area with the four courtyards and Fencers. Travel down these hallways into the basement until you come to an area that seems to be "beating" like a human heart. Avoid the Evil Cores, and enter the boss door.
Moebius Brooch	Beat Crazy Mode and it becomes available in the shop. Equip it and Trevor can use sub-weapons without using hearts.

Enclave Goblin in Butcher Bay	When you reach "Pigsville" (the guards quarters) after meeting Pope Joe, continue through the shower area. Once you leave it and step into the first corridor, turn right and go into the doorway at the end of the hall. These are the guards' individual quarters. Go to the first room on the right (the nameplate reads "Keenan") and ring the doorbell. You'll hear mostly gibberish, but also a mention of "Vatar." Vatar was the main villain of Enclave, another game made by Starbreeze (who are the developers of Escape from Butcher Bay), and the voice is that of the goblin character, a low-ranking enemy in Vatar's forces.
Get Gomer's Smoke Packs for Free	In the Double Max security level portion of the game, you meet a prisoner in the entrance hallway of the Feed Ward who's willing to sell you five packs of smokes for a high total price. After buying them, they will be saved to your game automatically. Load your latest checkpoint, and you'll still have the smokes AND the money you paid for them.

Halo

Unlockable	Objective
Talking Grunt	During the last level, you'll come to a group of tunnels after the dropship pick up goes wrong. Take the tunnel on your right and there should be a fork leading to a dead end. If you head in that direction, you can hear a grunt talking about something phenomenonally droll.

Halo 2

Skulls

Skull	Location/Effect
Angry Mode	When you are the Master Chief trying to recover the index from the Prophet of Truth on the Covenant Holy City, go until you reach the first outdoor area with dirt and vegetation. Take a right as you enter this room and run up to the wall past the gravity lift that leads up to the sniper point. Get on top of the wall by going up the dirt mound on your left. Follow the wall until you reach the floating skull called Angry. This skull makes enemies fire at a faster rate.
Assassins Mode	A skull similar to the one that activates Blind mode can be found if you start on "Regret." After the first lift ride (before the first underwater elevator), grenade jump from the front awning of the lift to the ledge in front of you (the one with two turrets). Grenade jump again onto the next ledge. Go to the back of the building. On Easy, you'll only find the skull. On Legendary, however, 2 invisible elites carrying swords just shake their heads wildly, ignoring you completely.
Blind Mode	At the beginning of Outskirts, crouch jump on top of the light over the door, then jump to the left platform. Turn to your left and go down the long dark corridor and pick up the skull; it says blind and your screen flashes black for a while. In this mode you can not see your weapon, body, shields, ammo, or radar. To get rid of this feature: 1. Turn off your Xbox or Save and Quit. 2. Go to Campaign and select level and choose Cairo Station. 3. Skip the cinematics and then Save and Quit. 4. Go Outskirt and your HUD is back.
Envy Mode	On the level Delta Halo on Legendary difficulty, progress until you reach the area during the "Push through the covenant held ruins" where you have to clear a Landing Zone for the Pelican to drop weapons. You will know you are in the right area when Cortana says, "They're pouring out of the center building." That area has plasma turrets along its borders. A little bit after the left side turret you see the outline of a door in a wall, but the door has a solid rock slab in it and a rock in front of it. Jump on the rock then jump to the ledge above the door then jump on the ledge to the left. Now jump onto the building with the sealed door using grenades. Atop the building you will find two dancing elites and the "Envy Skull." Pick up the Envy Skull and you can use Active Camouflage like the Arbiter.

Halo 2 (continued)

Skull	Location/Effect
Famine Skull	After you get off of the slowly descending elevator in The Oracle, you come to a hallway where you see a handful of dead bodies. Continue into the next room, and you will be on the second floor of a room with windows. When you enter this room, look to the right, and find the third pane of glass. It should be to the right of a wall that has some flood guts splattered on it. Shoot out this window, and either window directly across the room. If you look below you will see a platform that has four tall posts. On the room's far side is a column between the two windows. Turn on your active camo, and jump to the center platform. Jump on either of the posts on the far side of the platform and jump to the column between the windows. Jump through the window you shot out and make a left. Walk all the way to the end and you'll find four flood elites convulsing on the floor, with the Famine Skull in the middle of them. When you have this skull, all weapons will have less ammo.
Grunts' Birthday Party Mode	In the level Arbiter on Legendary, once you get to the first banshee section, immediately fly straight to the bottom of the map. In one of the cracks where the large cylinders connect to the station are a circle of grunts dancing around a skull. When you pick up the skull, it says Grunt Birthday Party on the screen. Now when you kill a enemy with a head shot, they blow up like a plasma grenade was stuck to them. To get rid of this feature use the same method as the Blind mode.
Iron Mode	On the last Master Chief level, on Legendary difficulty, when you enter the final Gravity Lift, look up. A skull passes through you extremely quickly, so start holding ⊗ a bit before you actually pass it to grab hold of it. Once you grab the Iron Skull, Iron mode will be activated. This skull causes you to go back to the last checkpoint when you die in co-op mode.
Mythic Mode	In Sacred Icon, there's a pair of semi-outdoor areas, each with a large sentinel in front. Go past this area and down the piston and you'll be in a very dark and dank flood infested area. Use the boxes to jump up to the landing above. A handful of alcoves are on your right. The skull is in the third alcove, floating above a dead human flood.
Sputnik Mode	At the start of Quarantine Zone on Legendary difficulty, turn directly around, and see a tunnel. Head through the tunnel. Go straight across the open area, and you'll come across a broken pipe tunnel on your right. Straight in front of you is a small ledge running across the wall, above the green pit. Carefully get onto that small ledge and walk to the end to find the Sputnik Skull. In this mode explosion force and melee force is greater.
Thunderstorm Mode	On the level Cario Station on Legendary, get to the "Priority Shift" checkpoint. Progress until the room with mounted plasma turrets, right after the armory with the elites. Clear out this room, and get on the raised area with the plasma turret on the side of the wall where the window curves. Look for two parallel beams on the ledge above. Climb up the supports for these beams and crouch jump up onto the upper ledge, then onto the beams themselves. Walk in the direction you came from, jump on a small ledge sticking out to the left, and pick up the Thunderstorm Skull from inside the trash container. This turns all Covenants into their spec ops rank.

Halo 2 (continued)

Skull	Location/Effect
Unknown Skull	At the beginning of Armory, wait in the room until the Sarge starts telling you to get into the elevator. You must wait for him to say "Would it help if I said please?" When he says this, get into the elevator and go down to the tram. Get on the tram and face the inside of the building. Press up against the glass doors toward the inside of the building. Hold ⊗ and you should pick up the skull. It's on a stack of green crates, near the end of the tram ride.

Easter Eggs

Easter Egg	Description
Giant Soccer Ball	It's on the level Metropolis on any difficulty. Use the same method to get a Banshee through the tunnels as you would if you were getting the Scarab Gun. Now take your Banshee away from that half-dome thing and fly through the level using the same path you would as if you were walking. Once you get to the highway where the Warthogs are fighting the Ghosts, keep flying straight toward the half-demolished building. Fly into it and go to the bottom level. You find giant soccer ball! It's great fun to mess around with, especially if you have the Scarab Gun.
Messages on the Bomb	If you play multiplayer and hide with the bomb, then you probably have noticed this already. If you stand somewhere long enough, the Chief will start to toss the bomb up and catch it. Eventually he examines the bomb, and you can read what it says on the bottom. One message is "goodbye" and another is "xoxoxoxo".
Midship Bunny	On the level Midship, go to the top where the sword spawns. Now walk to the doorway that doesn't have a big roof. Look up and you should see an outline of a bunny!
Sign on Zanzibar	On the beach on Zanzibar, you will see signs that say NO SWIMMING. Go to your Xbox dashboard, go to the Settings, Clock, and change every number you can to 7 , then pop *Halo 2* back into your Xbox and load it up. WARNING: Do not sign into XBoxLive, it resets your clock. Now go to Split-Screen and start a game on Zanzibar. Go to the beach and look at the sign. It mentions that something is missing, and there is a bloody dog's head.
Posters at the Old Mombassa Crash Landing after Cairo	After you crash land on Old Mombassa, you can see posters all around with the Master Chief from the demo and some grunt posters.
The Face of Chris	On the map Containment, get a sniper rifle and go anywhere where you can see the part of the Halo in the sky that's closest to the Sun Base (the base with orange-yellow glowing buildings). Zoom in with the sniper on the part of the halo that's just below where it begins to get dark. In the clouds you should be able to see the face of Chris Carney (grinning happily), one of Bungie's developers.
Rex in Outskirts	Head toward the Blind Skull way, but when you go up there, take a left instead of a right and jump on the ledge, then crouch jump on top of another ledge (which would be right above the wreckage). Jump on the ledge across the wreckage then continue the pathway until you reach the area with the sword sticking out of the ground (inside a broken rooftop). Right next to it is a rock with the word REX written on it.
Weird Window Reflections on Headlong	In Headlong, grab a Banshee and fly to the part of the level with water. On the same side as the Warthogs spawn, almost at the end of the level itself, there are some windows. Look closely at them, they aren't reflecting the other side of the level, but showing concept art for *Halo 2*.

Halo 2 (continued)

Easter Egg	Description
Why am I here? Message in Beaver Creek	This easter egg is very simple. Go to Beaver Creek. Run to where the sniper rifle spawns. Jump onto the ledge in front of you and push all of the rocks down. When you push the big rock down, look at the wall that was behind it. If you look carefully and you can see "Why am I here?" scratched in to the wall. (If you cannot see it, back away from the wall some and it should look much clearer.)
Zanibar Computer Screen	On Zanzibar, after you open the gate the computer screen (used to open the gate) changes. When you zoom in on the words, you can read how to fix your computer and some other gags.

Unlockables

Unlockable	How to Unlock
Banshee in the Control Room	To get a Banshee inside the room where you fight Tartarus, first get a Banshee. After the Scarab destroys the front door, fly inside and go straight up as soon as you enter. Get out of your Banshee and make the door open, then get back in your Banshee and fly through. When the Brutes come through the next door you can kill them or fly past them, but make sure you aren't in your Banshee when the cutscene starts.
Get a Scarab Gun	Do this on the level Metropolis. It's easiest when done on Co-op. When you start out, cross the bridge. Take out every enemy and even your marines. When you're near the end, Cortana says something about a "Welcome Party." Three Banshees and a few Ghosts appear. Take them all out. Then 2 Wraiths and 2 Banshees appear. Take out both Wraiths, and only one Banshee. Have Player 1 continue through the tunnel, but have Player 2 stay outside and distract the Banshee. Once Player 1 reaches the area with the circular opening (a Jackal with a Beam rifle is present), take out the Jackal and head back to where Player 2 is. Get the Banshee to follow both players into the tunnel. Do not board it yet! The first few times it will come at you and fly back out, but stay where you are. It should come back after you. (If it doesn't, go back outside and try again.) Eventually, you have to get it over two roadblocks. Once it is past the second one, have both players stand near the entrance of the room where Player 1 took out the Jackal. It should fly at you and get stuck. Shoot off both of its wings so it can fit through. Have Player 1 walk slowly in front of the Banshee, making it follow him. Player 2 should be behind it, gently pushing it. Take it to the left and get ready to board it. As soon as you hit the checkpoint, the Elite in the Banshee will disappear. You only have about a second to get in before the Banshee also disappears. Both players should press ⊗ quickly. If you do it right, one of the players will be driving the Banshee! Take it outside and directly up. Very high in the sky are two skyscrapers with two bridges connecting them. In the middle of the bridge closest to you, there is something that looks like a plasma rifle. It's actually a Scarab gun! It has infinite ammo, so have fun. Just don't aim at the ground.
Skip Banshee Flight in the Arbitor level	When you first get to fly the Banshee, zoom toward the tower to your right. When you get closer, a nav-point appears. Go to it and the game will automatically advance to that spot in the story. By doing this, you've skipped the grueling 20 minute-long Banshee flight. On the downside, however, you don't have much of a chance to grab a Fuel Rod Cannon.
Skip Fight around the Delta Halo tower	After the cutscene with the hologram regret telling you how he will start the ring in Delta Halo, continue until you see a crate. Then jump on it, then onto the ledge. Walk around until it loads the checkpoint. You have skipped the battle.

Hidden Windmill Shuriken	Find this just outside Han's bar. If you are lucky enough, a hint in the form of a pink Kunai scroll will tell you to look for a special weapon left behind in an alley that "only a Ninja can get to." This "alley" is right outside Han's bar to the left. After defeating the ninjas outside, turn to the alley and look up. You will see a series of blue strips that you can use to run back and forth across the alley. Do this, starting with the first strip just outside of the alley, and then jump to the second and finally the third strip, all the while running along the wall. Once you hit the last strip, jump to the ledge right across from it. Here you find the Windmill Shuriken embedded in the wall, and an "Xbox" symbol that revives your KI energy and your life. Once you've taken the shuriken you can continue on with the mission with a new deadly weapon at your side. Doesn't work in Hard mode.

On the side of the road is a female clakker who knows about a black market in town, and she then tells you the password. The Black Market is located up a rope across from the Bounty Store. Go down the hallway, recite the password, and gain access. The store's items include: Bola Blasts, Wasps, Regen Upgrade, Stamina Upgrade, and Steel Knuckles.

Secret Grubb Statue	When you complete the Eugene Ius bounty you end up in a Grubb village. Proceed into the village by jumping across the rooftops. Turn right and keep going forward and you see a break to the right, leading to a little maze-like area. Turn right and there's a small forked path. Go left and you're right next to a rope. Climb it and jump on to the roof. You can see another rope that you have to jump onto. When you jump on it you can see a boarded-up window. Break it by shooting it or meleeing it. When you enter the room there is a shiny Grubb statue. It's worth a bit of moolah.
Sepia Graphics Filter	This code makes the graphics a brownish-yellow color that's synonymous with the western theme seen in Stranger's Wrath. While in-game and only one controller is plugged in (the first port), press LT, L, R, A, B, RT, B, A, R, L, LT After entering this, take a second controller, plug it into the fourth controller slot, then pull it back out. If done correctly, you will see the graphics filter change. To deactivate the code, repeat this process.

Hidden Bonus: Indestructible Weapons

At certain points throughout the game you find Weapon Racks containing "unique" weapons. These weapons are indicated in the Secondary Weapon Display with a question mark icon and are indestructible, unlike other secondary weapons. There are five of these weapons in all. For all but the Giant Hand, you need the Scorpion Sword. The Garden Flamingo and Teddy Bear must be completed before you find the Mask, and require you to backtrack along the path you would take when trying to complete the towers in which they are located. The Teddy Bear also requires you to break a wall during the Dahaka chase zone in that area. You get one chance only to find the Giant Hand and Glowing Sword.

Unlockable	How to Unlock
Garden Flamingo	Hanging Garden (present)—Behind a wall in the first alcove you reach if you were trying to reach the giant ladder in the past.
Giant Hand (little damage, instant knock down)	During the escape from the Tomb, find it in a small alcove to your left during the second (or third) Dahaka chase (depending on how you play).
Glowing Sword (Very high stats, also damages Prince)	Behind a wall in a pit immediately after the room covered in fog.
Hockey Stick	Central Hall (past), rotate the switch toward the Hourglass Room. Use the new path to reach a breakable wall at the bottom of the room.
Teddy Bear (little damage, heals the Prince with each hit)	Mechanical Pit (present), in the area where you fought the second Brute, take the stairs up and look for a breakable wall in the water-filled pit.

Look for a door with a plaque on either side of it that reads, "No Hidden Content Here." Don't try to open the door; just walk through it. Inside, you'll find an empty room with a tall ladder. Climb it, and when you reach the top, look up; there is a gigantic beating heart, held in place by chains.

BLACK-EYE SKULL

Effect: Melee hits instantly recharge your shield.

Level: Crow's Nest

Location: As soon as you start the level, head straight up to the higher level. Head toward the door with the red light, then turn around. Jump onto the racks, onto the red metal light holders, then onto the ventilation tube. The skull spawns at the end.

BLIND SKULL

Effect: "Shoot from the hip."

Level: First Stage

Location: When you get to the area where you see the Phantom overhead (one of the marines points it out) jump over the rocks and keep following the path on the right. When you get to the cliff, there's a rock over on the side. The skull is on the end of the rock. Note: This skull has to be activated before you start a Campaign map.

CATCH SKULL

Effect: all enemies have 2 grenades, throw more grenades.

Level: The Storm

Protected by copyright. Unauthorized or unlawful copying or downloading expressly prohibited.

Halo 3 (continued)

Location: From the start, go through until you go outside again. Outside, look straight across to a small round building. The skull is on top. To get up there, either use a warthog as a platform or grenade-jump. DO NOT destroy the wraith near the door or the skull will disappear.

COWBELL SKULL

Effect: Explosive force increased (sputnik from H2).

Level: The Ark

Location: First pick up a grav lift from the small building near where you fight the scarab. Now proceed through the level until you reach the second sloping hallway (stairway). You should see some partitioned risers (platforms) halfway down. The skull is on the top level. Toss the grav-lift on the right side of the hall so it lands on the fourth little green dot from the door. Then run, jump, and use the grav-lift to propel you to the top. You reach a checkpoint just as you enter the room, so if you miss, just try again.

FAMINE SKULL

Effect: "Trust us. Bring a magazine." Dropped weapons have very little ammo compared to normal.

Level: The Ark

Location: When you first go into the valley to the right after the wrecked phantom, look left to see a huge boulder. Use a ghost and get to the side of the boulder closest to the bridge overhead. It is easy to pilot the ghost up the side of the wall using the thrust. To get the skull, pilot 2 ghosts up the wall to the top of the bridge and stack them one on top of another next to the beam where the skull is placed. Simply jump from the top of the ghosts toward the skull and land on the beam.

FOG SKULL

Effect: "You'll miss those eyes in the back of your head." Your motion sensor disappears.

Level: Floodgate

Location: As you are walking down from the anti-air gun you destroyed in the previous mission, you encounter a ramp (next to a missile launcher). Around this ramp, you hit a checkpoint. At this point, you should also hear a marine yelling, "There! Over There!" Look up and to the right, directly at the roof of the building next to the missile launcher. A single flood form (not to be mistaken for the two other flood forms jumping in front of you) holds the skull. Kill him before he jumps, and he drops the skull down to the ground where you can retrieve it. If you shoot too early, and the skull gets stuck on the roof.

GRUNT BIRTHDAY PARTY SKULL

Effect: Headshots on grunts cause heads to explode with confetti.

Level: Crow's Nest

Location: Right after the first objective, while en route to the barracks, you fall onto a pipe. At the end of this pipe, look over the edge to see a small space a few feet below you. Drop over and as quickly as you can, pull back to land under the floor you were just on. The skull is at the end.

IRON SKULL

Effect: When either player dies in Co-Op on any difficulty both players restart at last checkpoint. In single player, you restart the level if you die.

Level: Sierra 117

Location: In the area where you rescue Sarge, behind the prison cell is a large ledge. Go to the far right side and jump on the boxes, then onto the pipes to get up on the ledge. Go to the far end of the ledge, turn two corners, and the skull is at the far end.

IWHBYD SKULL

Effect: "But the dog beat me over the fence." Unlocks bonus dialogue throughout the game. For most, this is the last skull, so this gives you the Hayabusa Helmet as well.

Halo 3 (continued)

Level: The Covenant

Location: To get this, get to the room where you "fight" the Prophet of Truth. Let the Arbiter kill him, turn around, and kill all the flood here as well. This makes it a lot easier. Then jump through the Halo holograms in this order: 4 6 5 4 5 3 4. When you jump through the final hologram, they all light up in a sequential pattern. The skull is at the end, right before the energy bridge leading to Truth's corpse.

MYTHIC SKULL

Effect: Every enemy on the field now has double the normal amount of health.

Level: Halo

Location: As soon as the mission starts, walk up the hill in front of you and into the cave. Hug the right side of the cave, and after a large boulder you see a path on your right. Take the short path and find it at the end.

THUNDERSTORM SKULL

Effect: "Field promotions for everyone!" Upgrades enemies to their stronger versions.

Level: The Covenant

Location: After you shut down tower 1 and get access to the hornet, fly to tower 2 (the one the Arbiter shut down). While walking up the stairs, go to the middle part that connects both. A stair leads up to a platform where the skull is.

TILT SKULL

Effect: "What was once resistance is now immunity." Enemies have different body parts that may be resistant to certain bullet types.

Level: Cortana

Location: When in the circular type room with all the flood, look for a small structure piece next to two archways. Jump on top of it and up on the rocks to the top left, turn left and jump up again, then do a 180 and jump to the rocks across from you. Follow the rock sticking out and leading up on top of the original circular room. The skull is in a pile of blood.

TOUGH LUCK SKULL

Effect: Enemies do saving throws.

Level: Tsavo Highway

Location: On Tsavo Highway, about halfway through the mission (right after you are forced to walk through a large blue barrier), you will come out of a tunnel on the highway, and see a large pipeline on your left. Drop down in between the two, and run to the wall in front of you. Follow the wall all the way to where it connects with the cliff on your right, and turn to the left. There should be a few ledges—simply crouch-jump from ledge to ledge, and the last one should have the "Tough Luck" skull on it.

THE SEVEN TERMINALS

The Ark:

1. Start the mission and once you enter the first building, take a left into another door and emerge in a curved corridor. On the inside is a Terminal.

2. After activating the bridge to let your comrades across the gap, do a 180 and you should see it. (It does not open until you activate the bridge.)

3. In the third building after defeating the scarab, kill the group of sleeping covenant, then follow the corridor downward. Once you reach a door in front that is locked, immediately on the left there's an open door. Go through and walk straight, then do a 180 to find a secret room. It is in there.

The Covenant:

1. When in the first tower standing on the lift, face the access panel and turn left. Jump over and it's right there.

2. Land your hornet on the second tower, walk toward the entrance, but when you see the locked door, do a 180.

3. When in the third tower standing on the lift, face the access panel and turn right. Jump over.

Halo 3 (continued)

Halo:

1. After reaching the end of the first cave, hug the right wall and you see a building. Jump up onto the walkway and hang a left once inside.

After unlocking them in Arcade mode, get to the Character Select screen. Pause, then exit the game. You'll have them for the rest of that play session. Now, very important, when you start the game up the next time around, you need to first go to the Arcade mode. This loads the characters you unlocked. Just wait and get to the Character Select screen, then exit. Now you can play with the characters online. If you do not go to the Arcade mode first, you will erase the characters.
